Re: Cian MacLaitháin, Internship

To whom it May Concern;

This is to certify that Cian MacLaitháin successfully completed an Internship with TitanHQ from 30th May to 2nd September 2022 as Software Engineering Intern.

Cian was responsible for working on bugs and feature work for our DNS web filtering product, WebTitan, and worked closely with our extended Development team.

In particular, Cian work on the following:

- Conducted a thorough investigation on the implementation of DNSSEC support for WebTitan and documented the end-to-end process for building and deploying it. This enabled DNSSEC to be automatically enabled upon initial deployment of new clusters, and created a hotfix that enabled DNSSEC on WebTitan cloud servers that were already provisioned.
- Explored the feasibility of incorporating support for DNS-over-HTTPS (DoH) in WebTitan, while ensuring compatibility with our policy engine. Again, the process for enabling this was fully documented.
- Presented his findings on the implementation of DNSSEC within WebTitan and the changes required to support DoH
- Investigated issues related to our Windows endpoint agents, OTG for roaming users, and WebTitan active directory agent, with the aim of identifying and resolving underlying performance issues.
- Investigated installer issue with our dynamic IP agent.

Should you require any further information, please do not hesitate to contact hrteam@titanhq.com

Yours faithfully,

Seán Morris
